

GG4049, Geology of Sweden 7,5 hp HT24-VT25

Answer Count: 6

1. Overall, I am satisfied with the course.

Overall, I am satisfied with the course.	Number of responses
Disagree	0 (0,0%)
	0 (0,0%)
	0 (0,0%)
	0 (0,0%)
Totally agree	6 (100,0%)
Total	6 (100,0%)

2. The content of the course was relevant to me for achieving the intended learning outcomes.

The content of the course was relevant to me for achieving the intended learning outcomes.	Number of responses
Disagree	0 (0,0%)
	0 (0,0%)
	0 (0,0%)
	1 (16,7%)
Totally agree	5 (83,3%)
Total	6 (100,0%)

3. The teaching gave me good conditions to achieve the intended learning outcomes.

The teaching gave me good conditions to achieve the intended learning outcomes.	Number of responses
Disagree	0 (0,0%)
	0 (0,0%)
	0 (0,0%)
	2 (33,3%)
Totally agree	4 (66,7%)
Total	6 (100,0%)

4. The examination/assessment tested how well I achieved the intended learning outcomes.

The examination /assessment tested how well I achieved the intended learning outcomes.	Number of responses
Disagree	0 (0,0%)
	0 (0,0%)
	0 (0,0%)
	2 (33,3%)
Totally agree	4 (66,7%)
Total	6 (100,0%)

5. On average, I have spent approximately the following number of hours per week on the course, total time, including self-study.

On average, I have spent approximately the following number of hours per week on the course, total time, including self-study.

20

6. What was the best about the course?

What was the best about the course?

Swift feedback, relevant questions for each online exam and very good provided internet lectures.
Impact structures
You could do things entirely in your own pace
I could learn more about Geology of Sweden. I could understand the nature and why some places look as they look now. I learned many new things.
It was a great experience learning about the interesting geological development of Sweden; I would say the most interesting was the development of the Archaean and Proterozoic craton, and all the metamorphic alterations that these rocks have endured throughout their long history.

7. What improvements would you suggest?

What improvements would you suggest?

I would like to point out that, while the coursebook and lectures were great, I believe some integration with questions regarding other (free and available) scientific articles regarding relevant topics could have been incorporated into some areas that were studied.
.
It would be nice to have numbers on the slides on the online slideshow to make it easier when you want to go back and look at something, same for the practice questions it would be nice to have them numbered. Finally some image text explaining the images on the slides as well, e.g. sometimes you would see a picture of an interesting rock but there wasn't any explanation to what type of rock it was.
I do not have any suggestions. Thank you.
Due to my interest in fossils and the history of life, I would have been interested in seeing more focus on the palaeobiology of various regions and time periods than was presented in this course.
