

GG2008, Tellus I - Geology 15 credits, ST25

Answer Count: 17

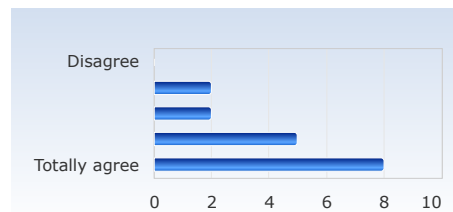

1. Overall, I am satisfied with the course.

Overall, I am satisfied with the course.	Number of responses
Disagree	1 (5,9%)
	0 (0,0%)
	3 (17,6%)
	6 (35,3%)
Totally agree	7 (41,2%)
Total	17 (100,0%)

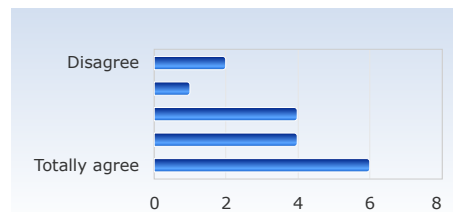

2. The content of the course was relevant to me for achieving the intended learning outcomes.

The content of the course was relevant to me for achieving the intended learning outcomes.	Number of responses
Disagree	0 (0,0%)
	2 (11,8%)
	2 (11,8%)
	5 (29,4%)
Totally agree	8 (47,1%)
Total	17 (100,0%)

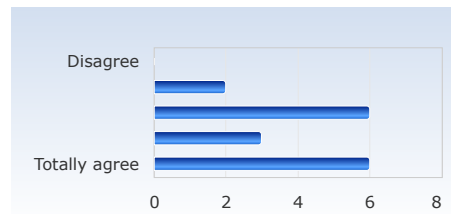

3. The teaching gave me good conditions to achieve the intended learning outcomes.

The teaching gave me good conditions to achieve the intended learning outcomes.	Number of responses
Disagree	2 (11,8%)
	1 (5,9%)
	4 (23,5%)
	4 (23,5%)
Totally agree	6 (35,3%)
Total	17 (100,0%)

4. The examination/assessment tested how well I achieved the intended learning outcomes.

The examination /assessment tested how well I achieved the intended learning outcomes.	Number of responses
Disagree	0 (0,0%)
	2 (11,8%)
	6 (35,3%)
	3 (17,6%)
Totally agree	6 (35,3%)
Total	17 (100,0%)

5. On average, I have spent approximately the following number of hours per week on the course, total time, including self-study.

On average, I have spent approximately the following number of hours per week on the course, total time, including self-study.

Due to personal reasons I studied alot in the end and not as much during the first period.
20

6. What was the best about the course?

What was the best about the course?

Self study
The videos
The assignments and quizzes.
Clear structure, good pace, supplementary recorded lecture, course book
The self studying and structured cite
The recordings and book were very interesting and easy to grasp. The rock books assignments were great and educational
Getting a personal rock box to use for research.
Mostly everything
The flexibility to study when I had time/energy and rest when I didn't, without the stress of falling behind or missing scheduled times
The best i thinks our teacher give us a rockbox without identify us which rocks are which rocks. We have to find out the rock and minerals from our study experience
Relevant and interesting
Learning about the rocks in the rockbox

7. What improvements would you suggest?

What improvements would you suggest?

I'm grateful that I have a background with 15hp in geoscience because if this would be my first introduction to geology i would never fulfilled the course.
Some assignments wanted a specific answer to a free write question, which wasn't ideal.
More involvement from the teachers and better contact with them
Examination could be better adjusted to the course syllable and focuse more on the understanding of the subjekt rather than random facts.
A read through and update of the interactive assignments and their instructions that were unclear at times or wrong at times.
None
It was pretty good overall. Hard to say.
There is no group study or task. I think this kind of course and expriment group study important
It was hard classifying the rocks by yourself, so an additional video about that would have been good.
Another form for exams, very stressful with 1 min time limit. Prefer to write full answers.
