ROMAN DENARII

Editorial note

Roman Denarii, Hoards and Stray Finds in Sweden is published by Stockholm Numismatic Institute (Gunnar Ekström chair in numismatics and monetary history) at Stockholm University. Hoards are defined as two or more coins or one coin found together with other objects.

Each issue will cover one or more finds. In the PDF-version the photos can be magnified c. ten times.

The series is edited by Kenneth Jonsson and the layout is made by Ylva Holmberg Jansson.

It is only distributed in PDF-format on the Internet which enables everybody to print it themselves.

After downloading the file it can be printed using Adobe Reader which is available for free at: www.adobe.com

Old numbers in the series can be downloaded at the website: www.archaeology.su.se/english/stockholm-numismatic-institute/publications-nfg.

The rate of publication depends on when a new manuscript is ready.

Other publications by Stockholm Numismatic Institute - NFG

On our website you will find various publications. Most of them are available as PDF for downloading. Read more on our website:
www.archaeology.su.se/english/stockholm-numismatic-institute/publications-nfg

CNS - Coins from the Viking-Age found in Sweden is a project under The Royal Academy of Letters, History and Antiquities. The acronym of the project is CNS based on the title of the publication. (CORPUS NUMMORUM SAECULORUM IX-XI QUI IN SUECIA REPERTI SUNT, CATALOGUE OF COINS FROM THE VIKING AGE FOUND IN SWEDEN). So far c. 259,000 coins have been found. Nine printed volumes were published 1975-2010. They list finds with more than 57,000 coins. The aim now is to publish all remaining finds on the Internet.

Myntstudier is a numismatic periodical in Swedish published on the Internet since 2003 by NFG.

A total of more than 80 seminar papers have been written. They cover the period c. 800-1800. The files (mainly in Swedish) are available for downloading at:
www.archaeology.su.se/numismatiska-forskningsgruppen/nfg-s-publikationer/uppsatser

On our website you will also find information about our research as well as maps showing mints and coin finds in Sweden.

Roman Denarii

Hoards and Stray Finds in Sweden

Background

Roman Imperial denarii of the first two or three centuries of our era may be regarded as the first coins in Sweden. On the territory of present-day Sweden some 8,000 pieces have been unearthed in modern times, most of them, c. 7,000, on Gotland, the island in the Baltic. Apart from one or two stray finds with Republican coins, the earliest coins belong to the reign of Nero (54-68). Denarii later than AD 200 are rare, and no such coin later than Severus Alexander (222-235) or, perhaps, Gordian III (238-244) can be connected with other denarii, i.e. of an earlier date. With the exception of late Roman and early Byzantine solidi of the fifth and sixth centuries, ancient coins of other origins or denominations are rare or non-existent.

Find context

Denarii have sometimes been found in the course of archaeological excavations of prehistoric settlements and graves, and, more recently, with the help of metal detectors. In contrast to what is the case in some other countries, however, the metal detector revolution has not dramatically increased the number of known coins in Sweden. The bulk of the coins known and extant has been brought to light casually, most often in the course of agricultural activities. Most of the coins available for study today came to light before 1940.

Degree of wear

Denarii are rarely found with contemporary coins of other denominations but sometimes with late Roman and early Byzantine solidi.

All denarii found in Sweden are worn, those on Gotland, however, to a larger degree than those from the rest of the country, sometimes making the attribution difficult or impossible. This is as true of extant coins found in the nineteenth century as of those found more recently.

The differences in the degree of wear between the denarii found on Gotland and those from the rest of Sweden have long been known to and discussed by scholars. Sture Bolin in 1926 suggested that the coins on Gotland had been worn through circulation on the island (Bolin 1926, pp. 274-278), but the composition of the large hoards, of which Bolin had insufficient knowledge, makes such a hypothesis unlikely (see Lind 1988 pp. 65-85 and 1993). Most probably the Gotlandic denarii were heavily worn already when they arrived at the island. The difference may be chronological, i.e. the coins which ended up on Gotland may have done so at a later date than those ending up in the rest of Sweden, and/or geographical, i.e. the coins found on Gotland may have had another origin on the European continent than those from the rest of the country.

To the genuine coins can be added a number of barbarous imitations, usually found together with official denarii. They almost exclusively belong to Gotland, and constitute about one per cent of the total number of coins found there. The largest hoard of Roman denarii found in Sweden (and Scandinavia), Sindarve on Gotland, originally 1,500 coins (1,488 extant), has four or five barbarous imitations. Die-links between barbarous imitations found in Sweden and on the European continent have been demonstrated.

Collections

Most of the denarii available for study are today kept in the collections of the Kungliga Myntkabinettet in Stockholm and the Gotlands Museum in Visby on Gotland. The large number of coins still extant from early finds is due to conditions special to Sweden. On the one hand the country has been spared from wars for a very long time, since 1815, in fact; on the other hand there has been a strict enforcement from an early date of laws concerning finds in the earth. The earliest hoard of denarii from which coins are still extant was found in 1834, and denarius hoards unearthed in the 1860s and 1870s are completely or almost completely preserved.

The Roman Denarii in Europe

Roman denarii in Sweden are found in the most northerly region of Europe, but they are not, as is well known, the only such coins discovered to the north of the Roman Imperial frontiers. Denarii have been found outside the old Roman Limes in a broad, west-to-east belt, from the North Sea and the Rhine to the Donets Basin (and occasionally even further to the east and north-east). In what is today Poland, for instance, a compass of land never part of the Roman Empire, the number of denarii found may amount to 100,000 or more. Any explanation as to the presence of denarii in Sweden must take those found on the European continent into consideration.

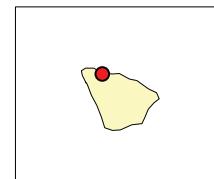

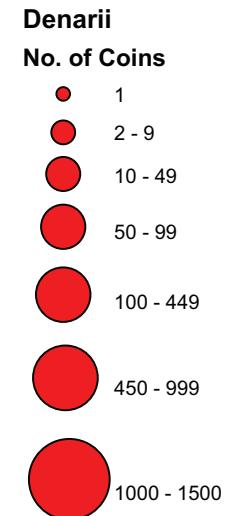

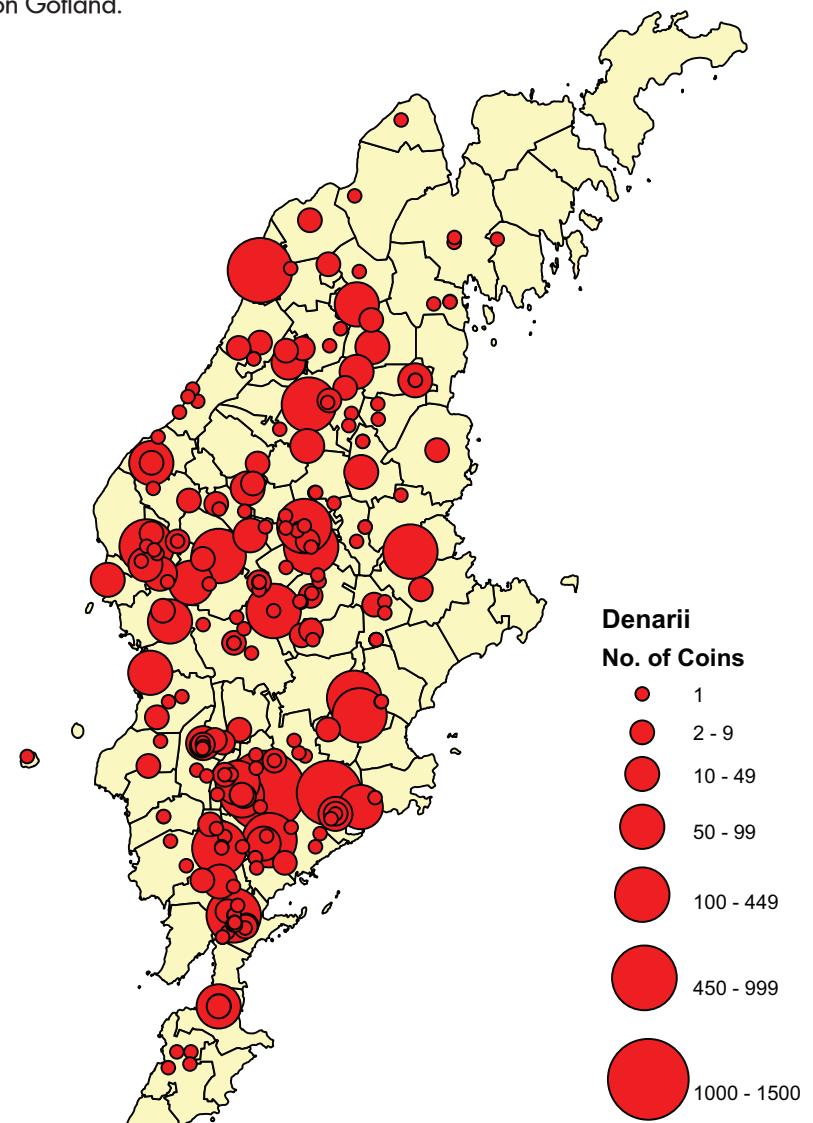

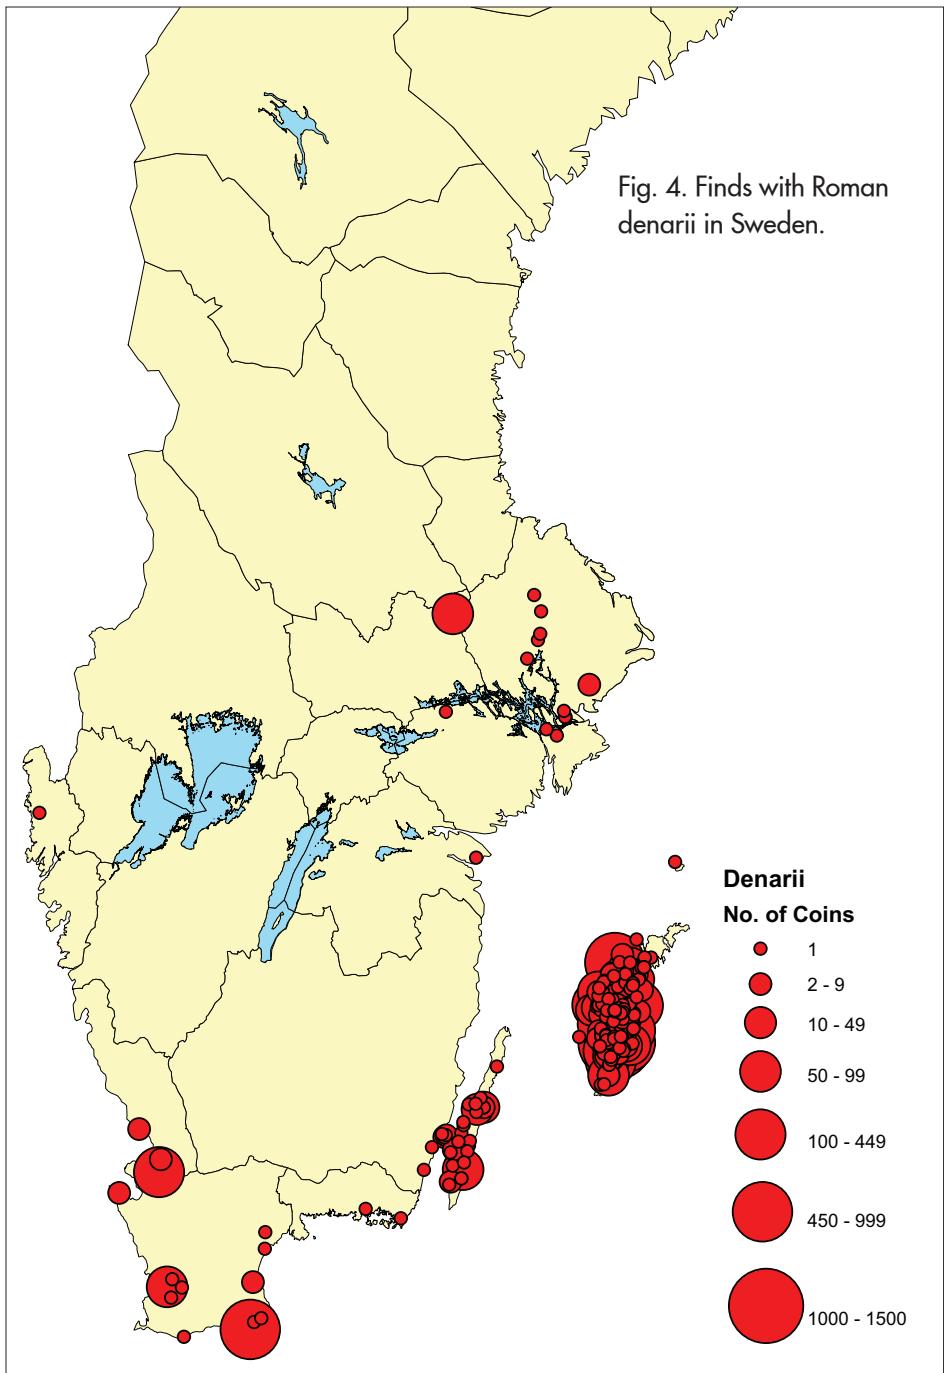

Fig. 5. Finds with Roman denarii on Gotland.

Gotland, Fröjel par., Mulde

GF C 8729

Year: 1935–6.

Category of find: hoard.

Other objects: none.

Weight: 137.84 g.

Find circumstances: The coins were found, on different occasions but within the same rather restricted area, in the poultry-yard of the farm. The coins lay loose in the surface of the soil, isolated or grouped together. All coins were handed over to the SHM in 1936, by Mrs. Ada Block, Visby, the farm-owner's daughter.

Whereabouts: The coins are kept in the Gotlands Museum (GF), Visby.

Sources: ATA, GF Inv.

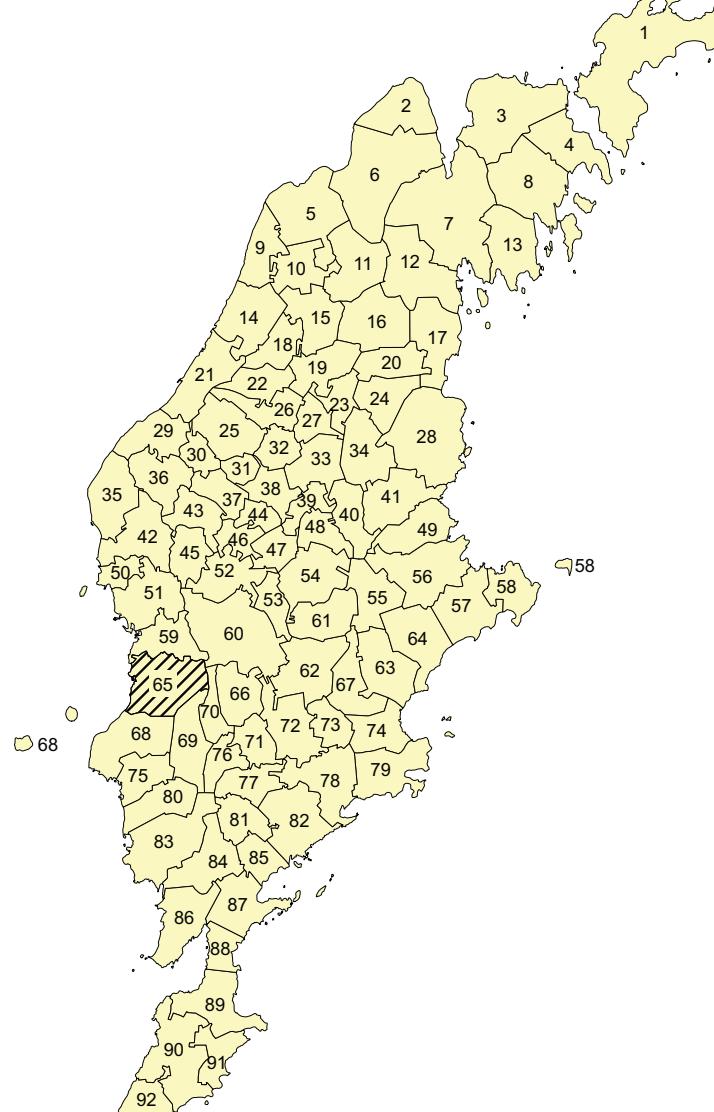

Literature: Lind 1981, no. 39; Östergren 1981, no. 43

Barbarous imitation, die-links outside Sweden

The reverse of the barbarous coin from the Mulde hoard, (no. 50), seems to be die-linked with that of a barbarous imitation in a European continental collection of high age, that of St. Paul im Lavanttal, Austria, published in 1983. From Alram et al. 1983, Tafel 19, 1514.

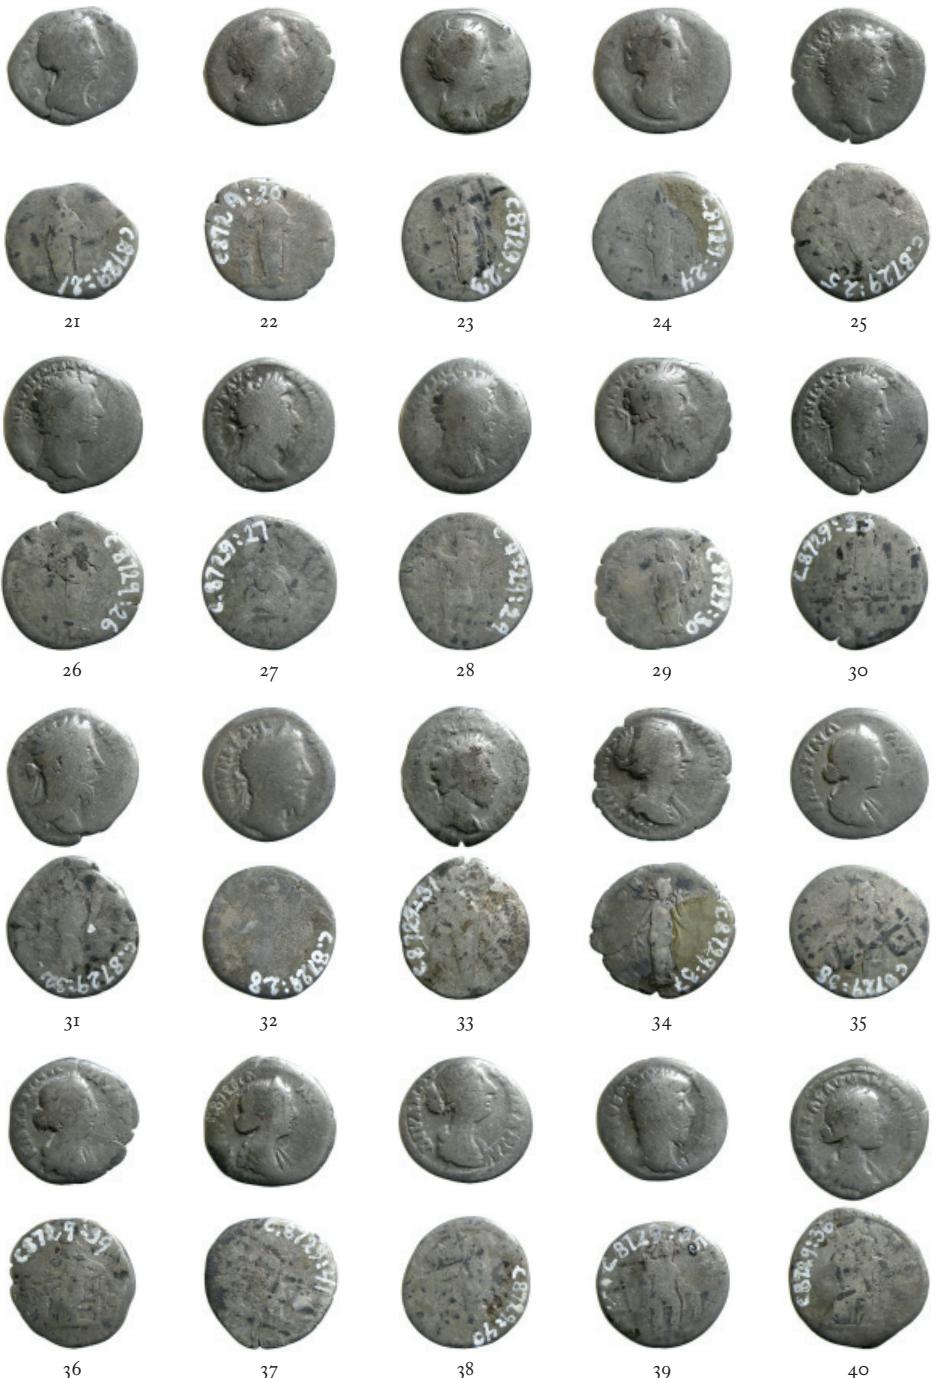

On the Internet site; [http://barbarous_imi-](http://barbarous_imitations.narod2.ru/podrazhaniya_iz_serebra/)

tations.narod2.ru/podrazhaniya_iz_serebra/, about imitations in silver of Roman coins found in the Ukraine and Moldova, there are some more coins die-linked to the imitation from the Mulde hoard, i.e., nos. 107, 269, 270, 325:1-2, the two last-mentioned made from the same pair of dies.

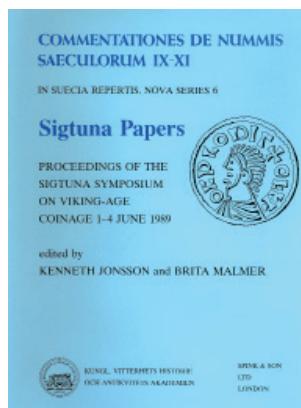

Roman Emperors and Empresses represented in Denarii

Augustus	27 B.C.–A.D. 14
Tiberius	A.D. 14–37
