Online forms

- You create your online form (currently done by the IO) with the data and documents you need.
- In general you have one online form for outgoing students and one for incoming students.
- Some departments have different online forms for different programs.

Publishing the online form

Online forms are published in your Portal

- The student portal in moveon 4 is a landing page for students, from which they can start and continue applications and see the status of applications.
- The portal is created once with a link which stays valid and will be published to the students.
- But the online forms which have to be created for every call of application will change in the portal.

Student View
Portal – administration in the Back Office

- You publish and administrate your online forms in the portal
- You can publish as many online forms you want
- Update the information posted in the portal
