

Policy for DBB co-financing of PhD student salaries

As for PhD students accepted into the PhD program after 2019-02-01, the following co-financing rules will apply:

Each main supervisor at DBB has 6 slots for graduate students (counting the ones already accepted) with co-financing from the department (presently 25 months). Slots are released 4 calendar years after the acceptance date regardless of if the student has finished or not. If the supervisor at the time of registration has no free slots, the incoming student will be financed by the supervisor for their entire PhD.

Depending on if the student teaches or not this system will allow each PI to continuously supervise 6-7 graduate students that are co-financed by the department.
