### Application for admission to latter part of program

**Important!** Before completing this form, read the information on the back and on our web page: [www.fysik.su.se/utbildning/](http://www.fysik.su.se/utbildning/)

I hereby apply for admission to the latter part of the following program:

- Bachelor program in physics, 3rd year
- Medical physics program, 3rd year
- Master program in computational physics, 2nd year
- Master program in physics, 2nd year
- Master program in theoretical physics, 2nd year

.....  
Name

.....  
Personnummer/T-number

.....  
Street address

.....  
Phone

.....  
Postal address

.....  
e-mail

My previous studies are from:  SU  Other university:.....

In addition to documents included in this application I also refer to documentation on:

- universityadmissions.se
- Ladok (only from SU)

In order for us to assess your application, it must be complete. You are responsible for making sure all relevant information is included.

I have read and understood the information about admission to the latter part of a program. This application is complete.

.....  
Signature

.....  
Place and date

Send to: **Fysikum, Stockholms universitet, 106 91 Stockholm** or [studievagledare@fysik.su.se](mailto:studievagledare@fysik.su.se).

**Application deadline: June 15**

### Fysikum

### **Important information regarding admission to the latter part of a program**

Admission is possible to the second year of all our master programs, as well as the third year of the Bachelor program in physics or the Medical Physics program. You must meet the prerequisites of the program in question to be admitted to the latter part. The requirements are given on our web page: [www.fysik.su.se](http://www.fysik.su.se)

A summary of necessary documentation is given below. Note that if you do not provide this information, your application may be judged incomplete and will not be processed. Further information is available on our web pages.

- Documentation showing that you meet the requirements for admission to the first year of the program.
- Documentation of your previous university-level studies; a transcript of records and/or a degree certificate.
- Relevant course plans or syllabi from previous and ongoing studies at other universities (not SU). If documents describing your previous courses are missing, we cannot assess your previous studies and you will not be able to meet the admission requirements.

*NB! Results which are available through [universityadmissions.se](http://universityadmissions.se) or reported in Ladok (at SU) do not need to be included. Instead you can check the corresponding box above. Please note that it is your responsibility to make sure that any such results are reported correctly. If anything is missing or incorrect, contact the university in charge of the course.*

In case we receive more applications than we can admit to the program, a selection will be made among the applicants. This will be based on the results from previous university studies.

### **Transfer of credits from previous studies**

Admission to the latter part of a program does not mean that your previous studies are automatically transferred to the program, nor is the assessment of your previous studies made a decision regarding credit transferal. Only a student at Stockholm University is eligible to apply for credit transferal. Please note that transferal is not always needed; courses from other Swedish universities can often be included directly in a degree. Please see our web pages or contact the academic advisor for more information.

*Data submitted will be saved and processed in order to assess your application. Information on how personal data is handled at Stockholm University can be found at: [www.su.se/personuppifter](http://www.su.se/personuppifter).*
