

# Activity Report 2013

## Preface

This is the CHESS Activity Report for 2013. The wealth and diversity of our research, teaching and contacts with the surrounding society cannot be fully captured in a report like this. However, the facts and figures contained in this report will hopefully provide you with a glimpse of what CHESS is all about: high quality research – often in collaboration with international partners – addressing the key issues in the research field of health inequalities; teaching and training of students at different levels; and a drive to link up research findings with discussions and decision making at different levels of society, from the local Swedish level to the global level. I hope that you find the activities and research topics that we work with at CHESS of interest.

CHESS is constantly developing and improving. This report for 2013 hopefully reflects that. We are nevertheless looking forward, striving to improve and develop our work even further during 2014. If there is more you want to know, please look up our website ([www.chess.su.se](http://www.chess.su.se)) or contact the researchers responsible for the project or topic that you are interested in.

Olle Lundberg  
Professor, Director

The CHESS Activity Report for 2013 was compiled by Ylva B Almquist, Venus Hailesilassie, and Jannike Kjellström.

## Education

### FAS-centre: Postgraduate programme

The postgraduate programme at CHESS was launched in January 2008 through a grant from the Swedish Research Council for Health, Working Life and Welfare (Forte/FAS). Olle Lundberg is the head of the programme whereas Bitte Modin is the coordinator. At the end of 2013, the postgraduate programme comprised 11 doctoral students in sociology, psychology and public health, affiliated to different departments at Stockholm University and Karolinska Institutet.

Nordic workshops are given regularly together with colleagues from Denmark and Finland. These workshops are organised over two days with PhD students presenting their work and commenting on other students work. Both junior and senior researchers participate as well. In April 2013, a PhD workshop was arranged at CHESS together with Finnish colleagues from the University of Helsinki. Other activities within the postgraduate programme included three "Journal Clubs", led by Denny Vågerö, where PhD students met to critically evaluate selected articles in the scientific literature.

## Doctoral programme

In 2013, Centre for Health Equity Studies (CHESS) introduced a doctoral programme in Public Health at Stockholm University. The doctoral programme is given in collaboration with Stress Research Institute (SFI). The programme focuses on perspectives on origins of health inequalities, how living and working conditions influence health over the life course, and the biopsychological mechanisms that may mediate these associations. During the autumn of 2013, four doctoral positions were announced (two at CHESS and two at SFI) within the programme.

## Master's programme

The year of 2013 constituted the second and third term for the students who started the master's programme in 2012. A total of 24 students were enrolled. The Director of Studies, Jenny Eklund, went on parental leave in October. Mikael Rostila was selected as the substitute Director of Studies.

Nine courses were given during the year. One of these courses was held in collaboration with Aging Research Center (ARC) and another one was held at the Demographic Unit at Stockholm University. The last of course of the year was "Introduction to Master Thesis in Public Health", during which the students formulated their thesis proposals. More than one half of the students were assigned supervisors from CHESS whereas the remaining students were assigned external supervisors from other departments at Stockholm University (Department of Sociology; Demography unit) and Karolinska Institutet (Department of Clinical Science, Intervention and Technology; Aging Research Center) as well as from e.g. Stockholm County Council and University of Gävle.

### Course

### Manager(s)

Life Course Approach to Health Equity Studies	Ilona Koupil
Health Inequalities among Children and Youth	Bitte Modin
Health Inequalities among the Elderly Population	Aging Research Center (KI/SU)

Apart from supervising our own master students, we supervised students at both the undergraduate level and the advanced level at e.g. Stockholm University, and University of Copenhagen. We have also taught courses and held lectures outside of CHESS, at e.g. Karolinska Institutet; Mid Sweden University; Lund University; Malmö University; Ersta Sköndal University College, and University of Gothenburg.

## Research

### Collaboration and exchange

The researchers at CHESS are involved in several ongoing data collections, such as the European Social Survey (ESS) the Uppsala Birth Cohort Multigenerational Study (UBCoS Multigen), the Elvis project, the Stockholm Birth Cohort Study (SBC), the Swedish Work and Mortality Database (WMD), Youth in Europe (CILS4EU), Learning Environments and Health, and the child supplements of the Level of Living Survey (Child-LNU).

During the year, we have collaborated with our research groups in several national projects, such as the Uppsala Family Study (Uppsala University), the Swedish Initiative for Research on Microdata in the Social and Medical Sciences (SIMSAM, Karolinska Institutet), the Level of Living survey (LNU and Child-LNU, Stockholm University), Health Behaviour in School-Aged Children (HBSC, Swedish National Institute of Public Health), and Individual Life Chances in Social Context – A Longitudinal Multi-Methods Perspective on Social Constraints and Opportunities (LIFEINCON, Stockholm University). We are also collaborating with others with regard to data materials established at CHESS, such as the Stockholm Birth Cohort study (Swedish Institute for Social Research at Stockholm University), the School Stress and Support study (Department of Psychology and the Stress Research Institute at Stockholm University), and the Uppsala Birth Cohort Multigenerational Study (Uppsala University).

CHESS researchers are also involved in international projects, such as Growing Inequalities' Impacts (GINI), Social inequalities of health in Sweden and Brazil, The Swedish Foundation for International Cooperation in Research and Higher Education (STINT), Determinants to Reduce Health Inequity via Early Childhood, Realising Fair Employment, and Social Protection (DRIVERS), Review of Social Determinants and the Health Divide in the European WHO Region for the WHO/Europe, Developing Methods to Reduce Inequalities the Determinants of Health (DEMETRIQ).

### Participation in conferences

During 2013, CHESS researchers have participated in numerous national and international conferences as invited speakers, presentors, or organisers: the congress of the European Association of Work and Organizational Psychology (Germany), International Symposium on Shiftwork and Working Time (Brazil), International Network for Research on Inequalities in Child Health (USA), Annual Scientific Meeting "Plasticity: Molecules to Motherhood and Beyond" (USA), European Public Health Conference (Belgium), Children First and Foremost/Platform for International Cooperation on Undocumented Migrants (Belgium), Socio-economic factors and their interplay with migration and ethnicity in producing health inequalities (Denmark), European Sociological Associations (Italy), ROAM member meeting (Denmark), Nordic Expert Meeting: Responsible Data Sharing Across Borders (Sweden).
