IF THERE IS A FIRE

1. Save. First of all, you have to think about saving people from the fire. Put yourself and others in a safe place. Get out on the street or the yard, or if you cannot do that, stay in your apartment and close all doors. The rescue services will help you out from the apartment through the window. Remember that smoke always rises. Therefore, you have to get below the smoke and it is easier to see and breathe if you stay close to the floor. Remember to use the staircase and not the elevators. Avoid smoke filled rooms and stairwells. Do not forget to close all doors behind you as you are leaving. A closed door prevents the fire from spreading quickly and it will give the rescue services more time. If you get to a closed door, do not open it to check if there is a fire on the other side because it may cause a backdraft. If you touch the upper part of the door and it is warm, there is probably a fire on the other side.

2. Alert. After you have put yourself in a secure place, call the rescue services by dialing 112. Tell them what has happened and your location.

3. Extinguish. You can then try to put out the fire, but you should not run the risk of injuring yourself or other people.

Please read general information for tenants for more information about fire safety.
