

# TARFALA RESEARCH STATION

*Tarfala Research Station (TRS) is located at 1135 m asl in the Kebnekaise Mountains, northern Sweden, and is run by Stockholm University. TRS welcomes scientists from all disciplines to conduct research in a unique arctic-alpine environment.*

## Spring field season completed, preparations for the summer field season in full swing

A very reduced crew of four TRS staff members conducted a short, intensive and successful spring field season, with fantastic support of Anders Bergwall and colleagues from Arctic Guides. National tv and radio, and Stockholm University reported about TRS, see some links below. The summer season will start on July 16<sup>th</sup>, and field assistants have been recruited – we are looking forward to welcoming them!
