CUSTOMER CARE AND SERVICE

Always use original spare parts.
When contacting our Authorised Service Centre, ensure that you have the following data available: Model, PNC, Serial Number.
The information can be found on the rating plate.

⚠ Warning / Caution-Safety information

ⓘ General information and tips

♺ Environmental information

Subject to change without notice.

1. ⚠ SAFETY INFORMATION

Before the installation and use of the appliance, carefully read the supplied instructions. The manufacturer is not

responsible for any injuries or damage that are the result of incorrect installation or usage. Always keep the instructions in a safe and accessible location for future reference.

1.1 Children and vulnerable people safety

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the appliance in a safe way and understand the hazards involved. Children of less than 8 years of age and persons with very extensive and complex disabilities shall be kept away from the appliance unless continuously supervised.
- Do not let children play with the appliance.
- Keep all packaging away from children and dispose of it appropriately.
- WARNING: Keep children and pets away from the appliance when it operates or when it cools down. Accessible parts become hot during use.
- If the appliance has a child safety device, it should be activated.
- Children shall not carry out cleaning and user maintenance of the appliance without supervision.

1.2 General Safety

- Only a qualified person must install this appliance and replace the cable.
- WARNING: The appliance and its accessible parts become hot during use. Care should be taken to avoid touching heating elements.
- Always use oven gloves to remove or put in accessories or ovenware.
- Before carrying out any maintenance, disconnect the appliance from the power supply.

- WARNING: Ensure that the appliance is switched off before replacing the lamp to avoid the possibility of electric shock.
- Do not use the appliance before installing it in the built-in structure.
- Do not use a steam cleaner to clean the appliance.
- Do not use harsh abrasive cleaners or sharp metal scrapers to clean the glass door since they can scratch the surface, which may result in shattering of the glass.
- If the mains power supply cable is damaged, it must be replaced by the manufacturer, its Authorised Service Centre or similarly qualified persons to avoid an electrical hazard.
- Excessive spillage must be removed before the pyrolytic cleaning. Remove all parts from the oven.
- To remove the shelf supports first pull the front of the shelf support and then the rear end away from the side walls. Install the shelf supports in the opposite sequence.
- Use only the food sensor (core temperature sensor) recommended for this appliance.

2. SAFETY INSTRUCTIONS

2.1 Installation

⚠ **WARNING!**
Only a qualified person must install this appliance.

- Remove all the packaging.
- Do not install or use a damaged appliance.
- Follow the installation instructions supplied with the appliance.
- Always take care when moving the appliance as it is heavy. Always use safety gloves and enclosed footwear.
- Do not pull the appliance by the handle.
- Install the appliance in a safe and suitable place that meets installation requirements.
- Keep the minimum distance from other appliances and units.

- Before mounting the appliance, check if the oven door opens without restraint.
- The appliance is equipped with an electric cooling system. It must be operated with the electric power supply.
- The built-in unit must meet the stability requirements of DIN 68930.

Cabinet minimum height (Cabinet under the worktop minimum height)	578 (600) mm
Cabinet width	560 mm
Cabinet depth	550 (550) mm

Height of the front of the appliance	594 mm
Height of the back of the appliance	576 mm
Width of the front of the appliance	595 mm
Width of the back of the appliance	559 mm
Depth of the appliance	567 mm
Built in depth of the appliance	546 mm
Depth with open door	1027 mm
Ventilation opening minimum size. Opening placed on the bottom rear side	560 x 20 mm
Mains supply cable length. Cable is placed in the right corner of the back side	1500 mm
Mounting screws	4 x 25 mm

2.2 Electrical connection

⚠ **WARNING!**
Risk of fire and electric shock.

- All electrical connections should be made by a qualified electrician.
- The appliance must be earthed.
- Make sure that the parameters on the rating plate are compatible with the electrical ratings of the mains power supply.
- Always use a correctly installed shockproof socket.
- Do not use multi-plug adapters and extension cables.
- Make sure not to cause damage to the mains plug and to the mains cable. Should the mains cable need to be replaced, this must be carried out by our Authorised Service Centre.
- Do not let mains cables touch or come near the appliance door or the niche below the appliance, especially when it operates or the door is hot.
- The shock protection of live and insulated parts must be fastened in such a way that it cannot be removed without tools.
- Connect the mains plug to the mains socket only at the end of the installation. Make sure that there is access to the mains plug after the installation.
- If the mains socket is loose, do not connect the mains plug.
- Do not pull the mains cable to disconnect the appliance. Always pull the mains plug.
- Use only correct isolation devices: line protecting cut-outs, fuses (screw type fuses removed from the holder), earth leakage trips and contactors.
- The electrical installation must have an isolation device which lets you disconnect the appliance from the mains at all poles. The isolation device must have a contact opening width of minimum 3 mm.
- Fully close the appliance door before you connect the mains plug to the mains socket.
- This appliance is supplied with a main plug and a main cable.

2.3 Use

⚠ **WARNING!**
Risk of injury, burns and electric shock or explosion.

- This appliance is for household use only.
- Do not change the specification of this appliance.
- Make sure that the ventilation openings are not blocked.
- Do not let the appliance stay unattended during operation.
- Deactivate the appliance after each use.
- Be careful when you open the appliance door while the appliance is in operation. Hot air can release.
- Do not operate the appliance with wet hands or when it has contact with water.
- Do not apply pressure on the open door.

- Do not use the appliance as a work surface or as a storage surface.
- Open the appliance door carefully. The use of ingredients with alcohol can cause a mixture of alcohol and air.
- Do not let sparks or open flames to come in contact with the appliance when you open the door.
- Do not put flammable products or items that are wet with flammable products in, near or on the appliance.

⚠ **WARNING!**
Risk of damage to the appliance.

- To prevent damage or discoloration to the enamel:
  - do not put ovenware or other objects in the appliance directly on the bottom.
  - do not put aluminium foil directly on the bottom of cavity of the appliance.
  - do not put water directly into the hot appliance.
  - do not keep moist dishes and food in the appliance after you finish the cooking.
  - be careful when you remove or install the accessories.
- Discoloration of the enamel or stainless steel has no effect on the performance of the appliance.
- Use a deep pan for moist cakes. Fruit juices cause stains that can be permanent.
- This appliance is for cooking purposes only. It must not be used for other purposes, for example room heating.
- Always cook with the oven door closed.
- If the appliance is installed behind a furniture panel (e.g. a door) make sure the door is never closed when the appliance operates. Heat and moisture can build up behind a closed furniture panel and cause subsequent damage to the appliance, the housing unit or the floor. Do not close the furniture panel until the appliance has cooled down completely after use.

2.4 Care and cleaning

⚠ **WARNING!**
Risk of injury, fire, or damage to the appliance.

- Before maintenance, deactivate the appliance and disconnect the mains plug from the mains socket.
- Make sure the appliance is cold. There is the risk that the glass panels can break.
- Replace immediately the door glass panels when they are damaged. Contact the Authorised Service Centre.
- Be careful when you remove the door from the appliance. The door is heavy!
- Clean regularly the appliance to prevent the deterioration of the surface material.
- Clean the appliance with a moist soft cloth. Use only neutral detergents. Do not use abrasive products, abrasive cleaning pads, solvents or metal objects.
- If you use an oven spray, follow the safety instructions on its packaging.

2.5 Pyrolytic cleaning

⚠ **WARNING!**
Risk of Injury / Fires / Chemical Emissions (Fumes) in Pyrolytic Mode. Do not start the Pyrolysis if the Plus Steam button is pressed in.

- Before carrying out a Pyrolitic self-cleaning function or the First Use please remove from the oven cavity:
  - any excess food residues, oil or grease spills / deposits.
  - any removable objects (including shelves, side rails etc., provided with the product) particularly any non-stick pots, pans, trays, utensils etc.
- Read carefully all the instructions for Pyrolytic cleaning.
- Keep children away from the appliance while the Pyrolytic cleaning operates.

The appliance becomes very hot and hot air is released from the front cooling vents.

- Pyrolytic cleaning is a high temperature operation that can release fumes from cooking residues and construction materials, as such consumers are strongly advised to:
  - provide good ventilation during and after each Pyrolytic cleaning.
  - provide good ventilation during and after the first use at maximum temperature operation.
- Unlike all humans, some birds and reptiles can be extremely sensitive to potential fumes emitted during the cleaning process of all Pyrolytic Ovens.
  - Remove any pets (especially birds) from the vicinity of the appliance location during and after the Pyrolytic cleaning and first use maximum temperature operation to a well ventilated area.
- Small pets can also be highly sensitive to the localized temperature changes in the vicinity of all Pyrolytic Ovens when the Pyrolytic self cleaning program is in operation.
- Non-stick surfaces on pots, pans, trays, utensils etc., can be damaged by the high temperature Pyrolytic cleaning operation of all Pyrolytic Ovens and can be also a source for low level harmful fumes.
- Fumes released from all Pyrolytic Ovens / Cooking Residues as described are not harmful to humans, including children, or persons with medical conditions.

2.6 Internal lighting

⚠ **WARNING!**
Risk of electric shock.

- Concerning the lamp(s) inside this product and spare part lamps sold separately: These lamps are intended to withstand extreme physical conditions in household appliances, such as temperature, vibration, humidity, or are intended to signal information about the operational status of the appliance. They are not intended to be used in other applications and are not suitable for household room illumination.
- Use only lamps with the same specifications.

2.7 Service

- To repair the appliance contact the Authorised Service Centre.
- Use original spare parts only.

2.8 Disposal

⚠ **WARNING!**
Risk of injury or suffocation.

- Disconnect the appliance from the mains supply.
- Cut off the mains electrical cable close to the appliance and dispose of it.
- Remove the door catch to prevent children or pets from becoming trapped in the appliance.

3. PRODUCT DESCRIPTION

3.1 General overview

1 Control panel
2 Knob for the heating functions
3 Power lamp / symbol
4 Display
5 Control knob (for the temperature)
6 Temperature indicator / symbol
7 Plus Steam
8 Socket for the food sensor
9 Heating element
10 Lamp
11 Fan
12 Shelf support, removable
13 Cavity embossment
14 Shelf positions
3.2 Accessories

Wire shelf
For cookware, cake tins, roasts.

Baking tray

For cakes and biscuits.

Grill- / Roasting pan
To bake and roast or as a pan to collect fat.

Patisserie tray

≤ 5 kg
For rolls, pretzels and small pastries. Suitable for steam functions. The discolouration of the surface has no effect on the functions.

Food Sensor
To measure the temperature inside food.

Telescopic runners
To insert and remove trays and wireshelf more easily.

4. CONTROL PANEL

4.1 Retractable knobs

To use the appliance press the knob.
The knob comes out.

4.2 Sensor fields / Buttons

🔔 -☼-3s	To set the MINUTE MINDER. Hold it for more than 3 seconds to turn on or turn off the oven lamp.
🕐	To set a clock function.
°C	To check the oven temperature or the temperature of the core temperature sensor (if applicable). Use only while a heating function operates.
🐷	To turn on the True Fan Cooking PLUS function.

4.3 Display
A. Timer / Temperature
B. Heat-up and residual heat indicator
C. Food Sensor (selected models only)
D. Door lock (selected models only)
E. Hours / minutes
F. Demo Mode
G. Clock functions

5. BEFORE FIRST USE

⚠️ **WARNING!**
Refer to Safety chapters.

Set the time before you use the oven.

5.1 Initial Cleaning

Step 1	Step 2	Step 3
Remove all accessories and removable shelf supports from the oven.	Clean the oven and the accessories with a soft cloth, warm water and a mild detergent.	Place the accessories and the removable shelf supports in the oven.

5.2 Initial preheating

🔲 **Preheat the empty oven before the first use.**

Step 1	Remove all accessories and removable shelf supports from the oven.
Step 2	Set the maximum temperature for the function: 🔲. Let the oven operate for 1 h.
Step 3	Set the maximum temperature for the function: 🔘. Let the oven operate for 15 min.

ⓘ The oven can emit an odour and smoke during preheating. Make sure that the room is ventilated.

6. DAILY USE

⚠️ **WARNING!**
Refer to Safety chapters.

6.1 How to set: Heating function

Step 1	Turn the knob for the heating functions to select a heating function.

Step 2	Turn the control knob to select the temperature.
Step 3	When the cooking ends, turn the knobs to the off position to turn off the oven.

6.2 Setting the function: True Fan Cooking PLUS

⚠️ **WARNING!**
Risk of burns and damage to the appliance.

Step 1	Make sure that the oven is cold.
Step 2	Fill the cavity embossment with tap water. ⓘ The maximum capacity of the cavity embossment is 250 ml. Do not refill the cavity embossment during cooking or when the oven is hot.
Step 3	Set the function: ⊚⊡. Press: ⊡. The indicator turns on. It works only with the function: True Fan Cooking PLUS.
Step 4	Turn the control knob for the temperature to set temperature.
Step 5	Preheat the empty oven for 10 min to create humidity.
Step 6	Put food in the oven. Refer to "Hints and tips" chapter. Do not open the oven door during cooking.
Step 7	Turn the knob for the heating functions to the off position to turn off the oven. ⊡ - press to turn off the oven. The indicator turns off.
Step 8	After the function ends, carefully open the door. Released humidity can cause burns.
Step 9	Make sure that the oven is cold. Remove the remaining water from the cavity embossment.

6.3 Fast Heat Up

The fast heat up decreases the heat up time.

ⓘ Do not put food in the oven when the Fast heat up operates.

1. Turn the knob for the oven functions to set the fast heat up.
2. Turn the knob for the temperature to set the temperature.
The signal sounds when the oven is at the set temperature.
3. Set an oven function.

6.4 Heat-up indicator

When the oven function operates, the

bars in the display ≣ appear one by one when the temperature in the oven increases, and disappear when it decreases.

6.5 Heating functions

Heating function	Application
0 Off position	The oven is off.
⟫ Fast Heat Up	To decrease the heat-up time.

Heating function	Application
True Fan Cooking / True Fan Cooking PLUS	To bake on up to three shelf positions at the same time and to dry food. Set the temperature 20 - 40 °C lower than for Conventional Cooking. To add humidity during the cooking. To get the right colour and crispy crust during baking. To give more juiciness during reheating.
Pizza Function	To bake pizza. To make intensive browning and a crispy bottom.
Conventional Cooking	To bake and roast food on one shelf position.
Bottom Heat	To bake cakes with crispy bottom and to preserve food.
Defrost	To defrost food (vegetables and fruit). The defrosting time depends on the amount and size of the frozen food.
Moist Fan Baking	This function is designed to save energy during cooking. When you use this function, the temperature in the cavity may differ from the set temperature. The residual heat is used. The heating power may be reduced. For more information refer to "Daily Use" chapter, Notes on: Moist Fan Baking.

Heating function	Application
Grill	To grill thin pieces of food and to toast bread.
Turbo Grilling	To roast large meat joints or poultry with bones on one shelf position. To make gratins and to brown.
Pyrolysis	To turn on the pyrolytic cleaning of the oven.

(i) The lamp may turn off automatically at a temperature below 60 °C during some oven functions.

6.6 Notes on: Moist Fan Baking

This function was used to comply with the energy efficiency class and ecodesign requirements according to EU 65/2014 and EU 66/2014. Tests according to EN 60350-1.
The oven door should be closed during cooking so that the function is not interrupted and the oven operates with the highest energy efficiency possible.

When you use this function the lamp automatically turns off after 30 sec.

For the cooking instructions refer to "Hints and tips" chapter, Moist Fan Baking. For general energy saving recommendations refer to "Energy Efficiency" chapter, Energy Saving.

7. CLOCK FUNCTIONS

7.1 Clock functions table

Clock function	Application
⏱ Time of Day	To show or change the time of day. You can change the time of day only when the oven is off.
|→| Duration	To set the length of cooking. Use only when a heating function is set.
→| End Time	To set the oven turn-off time. Use only when a heating function is set.
|→| →| Time Delay	Combination of functions: Duration, End Time.
⌂ Minute Minder	To set a countdown time. This function has no effect on the operation of the oven. Minute Minder - can be set at any time, also if the oven is off.

7.2 How to set: Time of day

After the first connection to the mains,
wait until the display shows: **hr**, **12:00**.
12 - flashes.

Step 1	Turn the knob for the temperature to set the hour.
Step 2	⏱ - press to confirm. The display shows the set hour and: **min**. **00** - flashes.
Step 3	Turn the knob for the temperature to set the minutes.
Step 4	⏱ - press to confirm. The display shows the set time.

⏱ - press repeatedly to change the time of day. ⏱ - flashes in the display.

7.3 How to set function: Duration

Step 1	Set a heating function.
Step 2	⏱ - press repeatedly. |→| - starts to flash.
Step 3	Turn the control knob to set the minutes. ⏱ - press to confirm.

Step 4	Turn the knob for the temperature to set the hour. $\bigcirc$ - press to confirm. When the set time ends the signal sounds for 2 min. Time setting flashes in the display. The oven turns off automatically.
Step 5	Press any button to stop the signal.
Step 6	Turn the knobs to the off position.

7.4 How to set function: End
Time

Step 1	Set a heating function.
Step 2	$\bigcirc$ - press repeatedly. $\rightarrow\vert$ - starts to flash.
Step 3	Turn the knob for the temperature to set the hour. $\bigcirc$ - press to confirm.
Step 4	Turn the knob for the temperature to set the minutes. $\bigcirc$ - press to confirm. At the set end time the signal sounds for 2 min. The time setting flashes in the display. The oven turns off automatically.
Step 5	Press any button to stop the signal.
Step 6	Turn the knobs to the off position.

7.5 How to set function: Time
Delay

Step 1	Set a heating function.
Step 2	$\bigcirc$ - press repeatedly. $\vert\rightarrow\vert$ - starts to flash.
Step 3	Turn the knob for the temperature to set the minutes for the function: Duration. Press: $\bigcirc$.
Step 4	Turn the knob for the temperature to set the hour for the function: Duration. Press: $\bigcirc$. The display shows: $\rightarrow\vert$.
Step 5	Turn the knob for the temperature to set the hour for the function: End Time. Press: $\bigcirc$.
Step 6	Turn the knob for the temperature to set the minutes for the function: End Time. Press: $\bigcirc$.

The display shows: the set temperature, $|{\rightarrow}|$, ${\rightarrow}|$.
Oven turns on automatically later on, works for the set Duration time and stops at the set End Time.
At the set End Time the signal sounds for 2 min. The time setting flashes in the display. The oven turns off.

Step 7	Press any button to stop the signal.
Step 8	Turn the knobs to the off position.

7.6 How to set function: Minute Minder

Minute minder can be both set when the oven is turned on and off.

Step 1	🔔 -☼-**3s** - press repeatedly. 🔔, **00** - flash.
Step 2	Turn the knob for the temperature to set the seconds and then the minutes. When the time you set is longer than 60 min, **hr** flashes.
Step 3	Set the hours. Minute Minder - starts automatically after 5 sec. After 90% of the set time the signal sounds.
Step 4	When the set time ends the signal sounds for 2 min. **00:00**, 🔔 - flash. Press any button to stop the signal.

8. USING THE ACCESSORIES

⚠️ **WARNING!**
Refer to Safety chapters.

8.1 Food Sensor

Food Sensor - measures the temperature inside the food. When the food is at the set temperature, the oven turns off.

Set 2 temperatures:

• the oven temperature: minimum 120 °C,
• the food core temperature.
For the best cooking results:
• Ingredients should be at the room temperature.
• Food Sensor - do not use it with liquid dishes.
• Food Sensor - during cooking it must remain in the dish.

Every time you put the accessory in the socket, you need to set the core temperature time again. You cannot select the duration and end time.

The oven calculates the approximate cooking time, it may change during cooking.

Food categories: meat, poultry and fish

1. Set the oven function and temperature.
2. Insert the tip of the core temperature sensor into the centre of meat or fish, in the thickest part if possible. Make sure that at least 3/4 of the core temperature sensor is inside of the dish.

3. Put the plug of the core temperature sensor into the socket located in the front frame of the appliance.
The display shows the core temperature sensor symbol.

When you use the core temperature sensor for the first time, the default core temperature is 60 °C.

While ⚲ flashes, you can use the knob for the temperature to change the default core temperature. The display shows the symbol of the core temperature sensor and the default core temperature.

4. Press ⊕ to save the new core temperature, or wait 10 seconds for the setting to be saved automatically.

The new default core temperature is displayed during the next use of the core temperature sensor.

When the food is at the set core temperature, the default core temperature and ⚲ flashes. An acoustic signal sounds for 2 minutes.

5. Press any button or open the oven door to stop the acoustic signal.
6. Remove the core temperature sensor plug from the socket and remove the dish from the appliance.

⚠ **WARNING!**
There is a risk of burns as the core temperature sensor becomes hot. Be careful when you unplug it and remove it from the dish.

Food category: casserole

1. Set the oven function and temperature.
2. Place half of the ingredients in a baking dish.
3. Insert the tip of the core temperature sensor exactly in the centre of the casserole.The core temperature sensor should be stabilized in one place during baking. Use a solid ingredient to achieve that. Use the rim of the baking dish to support the silicone handle of the core temperature sensor. The tip of the core temperature sensor should not touch the bottom of a baking dish.
4. Cover the core temperature sensor with the remaining ingredients.
5. Put the plug of the core temperature sensor into the socket located in the front frame of the appliance.
The display shows the core temperature sensor symbol.

6. Press ⊕ to save the new core temperature, or wait 10 seconds for the setting to be saved automatically.

The new default core temperature is displayed during the next use of the core temperature sensor.

When the food is at the set core temperature, the default core temperature and ↗ flashes. An acoustic signal sounds for 2 minutes.

7. Press any button or open the oven door to stop the acoustic signal.

8. Remove the core temperature sensor plug from the socket and remove the dish from the appliance.

⚠ **WARNING!**
There is a risk of burns as the core temperature sensor becomes hot. Be careful when you unplug it and remove it from the dish.

Changing the temperature during the cooking

You can change the temperature at any time during the cooking:

1. Press °C:
- one time - the display shows the set core temperature which changes every 10 seconds to the current core temperature.
- two times - the display shows the current oven temperature which changes every 10 seconds to the set oven temperature.
- three times - the display shows the set oven temperature.

2. Use the knob for the temperature to change the temperature.

8.2 Inserting accessories

A small indentation at the top increases safety. The indentations are also anti-tip devices. The high rim around the shelf prevents cookware from slipping of the shelf.

Wire shelf: Push the shelf between the guide bars of the shelf support.	
Baking tray / Deep pan: Push the tray between the guide bars of the shelf support.	
Wire shelf, Baking tray / Deep pan:
Push the tray between the guide bars
of the shelf support and the wire shelf
on the guide bars above.
8.3 Using telescopic runners

Do not oil the telescopic runners.

Make sure you push back the telescopic
runners fully in the oven before you close
the oven door.

Wire shelf:
Put the wire shelf on the telescopic
runners.
Deep pan:
Put the deep pan on the telescopic
runners.
Wire shelf and deep pan together:
Place the wire shelf and the deep pan
together on the telescopic runner.
9. ADDITIONAL FUNCTIONS

9.1 How to use: Child lock

When the function is on the oven cannot be turned on accidentally.

Step 1	Ensure the knob for the heating functions is in the off position.
Step 2	⊙, °C - press and hold at the same time for 2 sec.

The signal sounds. SAFE , 🔒 - appear on the display. The door is locked.

To turn off the Child Lock, repeat the step 2.

9.2 How to use: function lock

You can turn on the function only when the oven works. When the function is on the temperature and time settings cannot be changed accidentally.

Step 1	Set an oven function.
Step 2	⊙, °C - press and hold at the same time for 2 sec. The signal sounds. **Loc** appears on the display for 5 sec.

To turn off the Function Lock, repeat step 2.

Loc appears on the display when you turn the control knob or press any button when the Function lock is on. When you turn the knob for the oven functions, the oven stops.

When you turn off the oven while the Function Lock is on, the Function Lock switches automatically to the Child Lock. Refer to "Additional functions" chapter, Using the Child Lock.

9.3 Residual heat indicator

When you turn off the oven, the display

shows the residual heat indicator ☰ if the temperature in the oven is more than 40 °C.Turn the knob for the temperature

left or right to check the oven temperature.

9.4 Automatic switch-off

For safety reasons the oven turns off after some time, if a heating function works and you do not change any settings.

🌡= (°C)	⊙ (h)
30 - 115	12.5
120 - 195	8.5
200 - 245	5.5
250 - maximum	3

After an automatic switch-off, turn the knobs to the off position.

The Automatic switch-off does not work with the functions: Light, Food Sensor, Duration, End Time.

9.5 Cooling fan

When the oven operates, the cooling fan turns on automatically to keep the surfaces of the oven cool. If you turn off the oven, the cooling fan can continue to operate until the oven cools down.

9.6 Mechanical door lock

The door lock is unlocked when you buy the oven.
CAUTION!
Do not move the door lock vertically.
Do not push the door lock when you close the oven door.
9.7 How to use mechanical door lock

1. To turn on the door lock pull the door lock forward until it locks in place.
2. To turn off the door lock push the door lock back into the panel.
9.8 Opening the door with turned on mechanical door lock

You can open the door when the mechanical door lock is turned on.

1. Push the door lock slightly.
2. Open the door by pulling it with the handle.
If you press the door lock until there is a click, you turn off the door lock.

10. HINTS AND TIPS

Refer to Safety chapters.

10.1 Cooking recommendations

The temperature and cooking times in the tables are guidelines only. They depend on the recipes and the quality and quantity of the ingredients used.
Your oven may bake or roast differently to the oven you had before. The tables below show recommended settings for temperature, cooking time and shelf position for specific types of the food.
If you cannot find the settings for a special recipe, look for the similar one.

10.2 True Fan Cooking PLUS

Use the second shelf position.

Use 150 ml of water.

Use a baking tray.

CAKES / PAS-TRIES / BREADS	(°C)	(min)
Cookies / Scones / Croissants	150 - 180	10 - 20
Focaccia	200 - 210	10 - 20
Pizza	230	10 - 20
Bread rolls	200	20 - 25
Bread	180	35 - 40
Plum cake / Apple pie / Cinnamon rolls, baked in a cake mould	160 - 180	30 - 60

Use 200 ml of water.

FROZEN READY MEALS	(°C)	(min)
Pizza	200 - 210	10 - 20
Croissants	170 - 180	15 - 25
Lasagne	180 - 200	35 - 50

Use 100 ml of water.

Set the temperature to 110 °C.

FOOD REGENERATION	(min)
Bread rolls	10 - 20
Bread	15 - 25
Focaccia	15 - 25
Meat	15 - 25
Pasta	15 - 25
Pizza	15 - 25
Rice	15 - 25

🎨 FOOD REGENERATION	⏱ (min)
Vegetables	15 - 25

Use 200 ml of water.

Use a glass baking dish.

🥩 ROASTING	🌡 (°C)	⏱ (min)
Roast beef	200	50 - 60
Chicken	210	60 - 80
Roast pork	180	65 - 80

10.3 Baking

For the first baking, use the lower temperature.

You can extend the baking time by 10 – 15 minutes if you bake cakes on more than one shelf position.

Cakes and pastries at different heights do not always brown equally. There is no need to change the temperature setting if an unequal browning occurs. The differences equalize during baking.

Trays in the oven can distort during baking. When the trays are cold again, the distortions disappear.

10.4 Tips on baking

Baking results	Possible cause	Remedy
The bottom of the cake is not baked sufficiently.	The shelf position is incorrect.	Put the cake on a lower shelf.
The cake sinks and becomes soggy or streaky.	The oven temperature is too high.	Next time set slightly lower oven temperature.
	The oven temperature is too high and the baking time is too short.	Next time set a longer baking time and lower oven temperature.
The cake is too dry.	The oven temperature is too low.	Next time set higher oven temperature.
	The baking time is too long.	Next time set shorter baking time.

Baking results	Possible cause	Remedy
The cake bakes unevenly.	The oven temperature is too high and the baking time is too short.	Next time set a longer baking time and lower oven temperature.
	The cake batter is not evenly distributed.	Next time spread the cake batter evenly on the baking tray.
The cake is not ready in the baking time specified in a recipe.	The oven temperature is too low.	Next time set a slightly higher oven temperature.

10.5 Baking on one shelf level

BAKING IN TINS		(°C)	(min)	
Flan base - short pastry, preheat the empty oven	True Fan Cooking	170 - 180	10 - 25	2
Flan base - sponge cake mixture	True Fan Cooking	150 - 170	20 - 25	2

Biscuits made of egg white / Meringues	80 - 100	130 - 170	1 / 4	-

10.8 Tips on Roasting

Use heat-resistant ovenware.

Roast lean meat covered (you can use aluminium foil).

Roast large meat joints directly in the tray or on the wire shelf placed above the tray.

Put some water in the tray to prevent dripping fat from burning.

Turn the roast after 1/2 - 2/3 of the cooking time.

Roast meat and fish in large pieces (1 kg or more).

Baste meat joints with their own juice several times during roasting.

10.9 Roasting

Use the first shelf position.

![BEEF] BEEF

Baked cheese	170 - 190	20 - 30	3
Chicken wings	190 - 210	20 - 30	2

10.13 Defrost

Remove the food packaging and put the food on a plate.

Do not cover the food, as this can extend the defrost time.

For large portions of food place an upturned empty plate on the bottom of the oven cavity. Put the food in a deep dish and set it on top of the plate inside the oven. Remove the shelf supports if necessary.

Use the first shelf position.

✕✦	⚖️ (kg)	⏲️ (min) Defrosting time	⏲️ (min) Further defrosting time	ℹ️
Chicken	1	100 - 140	20 - 30	Turn halfway through.
Meat	1	100 - 140	20 - 30	Turn halfway through.
Trout	0.15	25 - 35	10 - 15	-
Strawberries	0.3	30 - 40	10 - 20	-
Butter	0.25	30 - 40	10 - 15	-
Cream	2 x 0.2	80 - 100	10 - 15	Whip the cream when still slightly frozen in places.
Gateau	1.4	60	60	-

10.14 Preserving

Use the function Bottom Heat.

Use only preserve jars of the same dimensions available on the market.

Do not use jars with twist-off and bayonet type lids or metal tins.

Use the first shelf position.

Put no more than six one-litre preserve jars on the baking tray.

Fill the jars equally and close with a clamp.

The jars cannot touch each other.

Put approximately 1/2 litre of water into the baking tray to give sufficient moisture in the oven.

When the liquid in the jars starts to simmer (after approximately 35 - 60 minutes with one-litre jars), stop the oven or decrease the temperature to 100 °C (see the table).

Set the temperature to 160 - 170 °C.

🍐 SOFT FRUIT	⏲️ (min) Cooking time until simmering
Strawberries / Blueberries / Raspberries / Ripe gooseberries	35 - 45

🍐 STONE FRUIT	⏲️ (min) Cooking time until simmering	⏲️ (min) Continue to cook at 100 °C

11. CARE AND CLEANING

WARNING!
Refer to Safety chapters.

11.1 Notes on cleaning

Cleaning Agents	Clean the front of the oven with a soft cloth with warm water and a mild detergent.
	Use a cleaning solution to clean metal surfaces.
	Clean stains with a mild detergent.

Everyday Use	Clean the cavity after each use. Fat accumulation or other residue may cause fire.
	Do not store the food in the oven for longer than 20 minutes. Dry the cavity with a soft cloth after each use.

Accessories	Clean all accessories after each use and let them dry. Use a soft cloth with warm water and a mild detergent. Do not clean the accessories in a dishwasher.
	Do not clean the non-stick accessories using abrasive cleaner or sharp-edged objects.
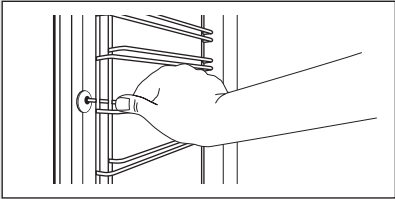

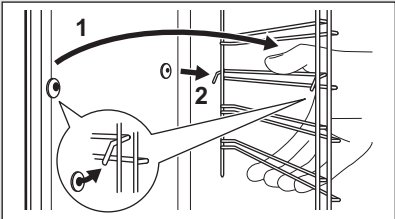

11.2 How to clean: Cavity embossment

Clean the cavity embossment to remove limestone residue after cooking with steam.

Step 1	Step 2	Step 3
Pour: 250 ml of white vinegar into the cavity embossment. Use maximum 6% vinegar without any additives.	Let the vinegar dissolve the limestone residue at the ambient temperature for 30 minutes.	Clean the cavity with warm water and a soft cloth.
For the function: True Fan Cooking PLUS clean the oven for every 5 - 10 cooking cycles.		

11.3 How to remove: Shelf supports

Remove the shelf supports to clean the oven.

Step 1	Turn off the oven and wait until it is cold.	
Step 2	Pull the front of the shelf support away from the side wall.	

Step 3	Pull the rear end of the shelf support away from the side wall and remove it.	
Step 4	Install the shelf supports in the opposite sequence. The retaining pins on the telescopic runners must point to the front.	

11.4 How to use: Pyrolytic cleaning

Clean the oven with pyrolytic cleaning.

⚠ **WARNING!**
There is a risk of burns.
⚠ **CAUTION!**
If there are other appliances installed in the same cabinet, do not use them at the same time as this function. It can cause damage to the oven.

Before the pyrolytic cleaning:		
Turn off the oven and wait until it is cold.	Remove all accessories and removable shelf supports.	Clean the oven floor and the inner door glass with warm water, a soft cloth and a mild detergent.

Step 1	Set the function: 🁢. |→| - flashes.	
Step 2	Turn the control knob (for the temperature) to set the cleaning mode.	

	Option	Cleaning mode	Duration
	P1	Light cleaning	1 h 30 min
	P2	Normal cleaning	3 h

Step 3	⊘ - press to start the cleaning.
Step 4	After cleaning, turn the knob for the heating functions to the off position.

ⓘ During the cleaning the oven lamp is off. The oven door stays locked. When the oven is cold, the door unlocks.

When the oven is at the set temperature, the door locks. Until the door unlocks the display shows: the bars of the heat indicator, 🔒.

When the cleaning ends:		
Turn off the oven and wait until it is cold.	Clean the cavity with a soft cloth.	Remove the residue from the bottom of the cavity.

11.5 Cleaning reminder

The oven reminds you when to clean the oven with: pyrolytic cleaning.

PYR - flashes in the display for 10 sec after each activation and deactivation of the oven.

🔔
-☼-3s , °C - press at the same time to turn off the reminder.

11.6 How to remove and install: Door

You can remove the door and the internal glass panels to clean it. The number of glass panels is different for different models.

⚠ **WARNING!**
The door is heavy.
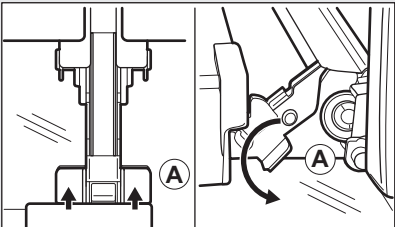

⚠ **CAUTION!**
Carefully handle the glass, especially around the edges of the front panel. The glass can break.

Step 1	Fully open the door.	
Step 2	Lift and press the clamping levers (A) on the two door hinges.	

Step 3	Close the oven door to the first opening position (approximately 70° angle). Hold the door at both sides and pull it away from the oven at an upwards angle. Put the door with the outer side down on a soft cloth on a stable surface.
Step 4	Hold the door trim (B) on the top edge of the door at the two sides and push inwards to release the clip seal.
Step 5	Pull the door trim to the front to remove it.
Step 6	Hold the door glass panels on their top edge one by one and pull them up out of the guide.
Step 7	Clean the glass panel with water and soap. Dry the glass panel carefully. Do not clean the glass panels in the dishwasher.
Step 8	After cleaning, do the above steps in the opposite sequence.
Step 9	Install the smaller panel first, then the larger and the door. Make sure that the glasses are inserted in the correct position otherwise the surface of the door may overheat.

11.7 How to replace: Lamp
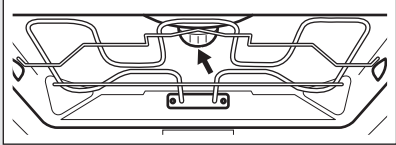

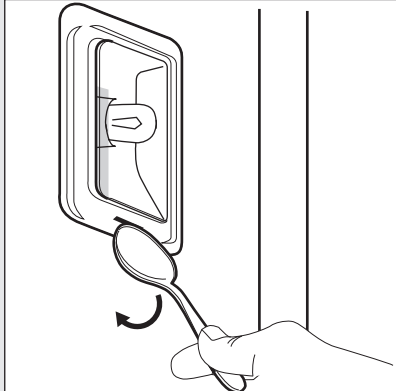

⚠️ **WARNING!**
Risk of electric shock.
The lamp can be hot.

Before you replace the lamp:		
Step 1	**Step 2**	**Step 3**
Turn off the oven. Wait until the oven is cold.	Disconnect the oven from the mains.	Put a cloth on the bottom of the cavity.

Top lamp

Step 1	Turn the glass cover to remove it.	
Step 2	Clean the glass cover.	
Step 3	Replace the lamp with a suitable 300 °C heat-resistant lamp.	
Step 4	Install the glass cover.	

Side lamp

Step 1	Remove the left shelf support to get access to the lamp.	
Step 2	Use a narrow, blunt object (e.g. a teaspoon) to remove the glass cover.	
Step 3	Clean the glass cover.	
Step 4	Replace the lamp with a suitable 300 °C heat-resistant lamp.	
Step 5	Install the glass cover.	
Step 6	Install the left shelf support.	

12. TROUBLESHOOTING

⚠ **WARNING!**
Refer to Safety chapters.

12.1 What to do if...

In any cases not included in this table please contact with an Authorised Service Centre.

The oven does not turn on or does not heat up

Problem	Check if...

The oven does not turn on or does not heat up

You cannot activate or operate the oven.	The oven is correctly connected to an electrical supply.
The oven does not heat up.	The automatic switch-off is deactivated.
The oven does not heat up.	The oven door is closed.

🔲 The oven does not turn on or does not heat up

The oven does not heat up.	The fuse is blown.
The oven does not heat up.	The Child Lock is off.

🖐 Components

Problem	Check if...
The lamp is turned off.	Moist Fan Baking - is turned on.
The lamp does not work.	The lamp is burnt out.
The Food Sensor does not operate.	The plug of the Food Sensor is fully inserted into the socket.

❓ Error codes

The display shows...	Check if...
C2	You removed the Food Sensor plug from the socket.
C3	The oven door is closed or the door lock is not broken.
C4	The Plus Steam is on.
F102	The oven door is closed.
F102	The door lock is not broken.
12:00	There was a power cut. Set the time of day.

❓ Error codes

If the display shows an error code that is not in this table turn the house fuse off and on to restart the oven. If the error code recurs contact an Authorised Service Centre.
💧 Cleaning

Problem	Check if...
The water leaks out of the cavity embossment.	There is too much water in the cavity embossment.

🔲 Other problems

Problem	Check if...
Unsatisfying cooking performance of the function: True Fan Cooking PLUS .	You filled the cavity embossment with water.
The appliance is activated and does not heat up. The fan does not operate. The display shows "Demo".	The Demo Mode is deactivated: 1. Tur off the oven. 2. 🔔 -3s , ⏱, ℃ - press and hold at the same time. 3. The first digit on the display and Demo flash. 4. Turn the knob for temperature to enter the code: 2468. Press: ⏱. The next digit flashes.

12.2 Service data

If you cannot find a solution to the problem yourself, contact your dealer or an Authorised Service Centre.

The necessary data for the service centre is on the rating plate. The rating plate is on the front frame of the oven cavity. Do not remove the rating plate from the oven cavity.

We recommend that you write the data here:	
Model (MOD.)	....
Product number (PNC)	....
Serial number (S.N.)	....

13. ENERGY EFFICIENCY

13.1 Product Information and Product Information Sheet*

Supplier's name	Electrolux
Model identification	CKP720V 944184895, 944184969 CKP720X 944184842, 944184958 CKP8000V 944184977 CKP8000X 944184976
Energy Efficiency Index	81.2
Energy efficiency class	A+
Energy consumption with a standard load, conventional mode	1.09 kWh/cycle
Energy consumption with a standard load, fan-forced mode	0.69 kWh/cycle
Number of cavities	1
Heat source	Electricity
Volume	71 l
Type of oven	Built-In Oven
Mass	CKP720V	36.5 kg
	CKP720X	36.5 kg
	CKP8000V	36.5 kg
	CKP8000X	36.5 kg

* For European Union according to EU Regulations 65/2014 and 66/2014.
For Republic of Belarus according to STB 2478-2017, Appendix G; STB 2477-2017, Annexes A and B.
For Ukraine according to 568/32020.

Energy efficiency class is not applicable for Russia.

EN 60350-1 - Household electric cooking appliances - Part 1: Ranges, ovens, steam ovens and grills - Methods for measuring performance.

13.2 Energy saving

The oven has features which help you save energy during everyday cooking.

Make sure that the oven door is closed when the oven operates. Do not open the oven door too often during cooking. Keep the door gasket clean and make sure it is well fixed in its position.

Use metal cookware to improve energy saving.

When possible, do not preheat the oven before cooking.

Keep breaks between baking as short as possible when you prepare a few dishes at one time.

Cooking with fan
When possible, use the cooking functions with fan to save energy.

Residual heat
If a programme with the Duration or End Time selection is activated and the cooking time is longer than 30 min, the heating elements automatically turn off earlier in some oven functions.

The fan and lamp continue to operate. When you turn off the oven, the display shows the residual heat. You can use that heat to keep the food warm.

When the cooking duration is longer than 30 min, reduce the oven temperature to minimum 3 - 10 min before the end of cooking. The residual heat inside the oven will continue to cook.

Use the residual heat to warm up other dishes.

Keep food warm
Choose the lowest possible temperature setting to use residual heat and keep a meal warm. The residual heat indicator or temperature appears on the display.

Cooking with the lamp off
Turn off the lamp during cooking. Turn it on only when you need it.

Moist Fan Baking
Function designed to save energy during cooking.

When you use this function the lamp automatically turns off after 30 sec. You may turn on the lamp again but this action will reduce the expected energy savings.

14. ENVIRONMENTAL CONCERNS

Recycle materials with the symbol ♻. Put the packaging in relevant containers to recycle it. Help protect the environment and human health by recycling waste of electrical and electronic appliances. Do not dispose of appliances marked with the symbol ⊠ with the household waste. Return the product to your local recycling facility or contact your municipal office.
