### The Bolin Days 2021 - Welcome to register!

[Register for the Bolin Days 2021 here »](#)

The Bolin Days is our annual internal conference for and by our Bolin Centre members. During these days, new climate science results are presented and we meet each other to exchange ideas, share our experiences and find new inspiration. We welcome you to take part in a set of cross-disciplinary sessions organized by our Research Area leaders. You have the opportunity to meet our External Science Advisory Group, there will be a poster exhibition and as usual, a poster competition for PhD students. We start both days with a lunch at 11h00. The Bolin Days ends with a dinner in Aula Magna's Gallery on day two, followed by a pub and a Ceilidh in Geovetenskapens hus.

#### **Hybrid event**

The Bolin Days this year will take place in Aula Magna and Geovetenskapens hus, Stockholm University, and via Zoom.

#### **Call for posters and PICO presentations**

The Bolin Days 2021 will have its traditional poster exhibition, this year in Geovetenskapens hus. The deadline for submission of poster and PICO presentations is 15 November. [Instructions are found here »](#)

The program for the Bolin Days is under development, and the full program will be available here at a later stage.

Welcome!

### Eos article showcasing the Bolin Centre-supported 'Miocene Temperature Portal'

Helen Coxall (Department of geological sciences) and Margret Steinhorsdottir (the Museum of Natural History), together with collaborators from the UK and USA just published an article in the Journal Eos describing their latest collaborative effort to build an interactive platform for cataloguing palaeo ocean temperature proxy data.

[Read the EOS-article here »](#)

This venture is the product of a series of Bolin Centre Research Area 6 (Deep time climate variability) and Research Area 1 (Ocean-atmosphere dynamics and climate) projects focusing on the Miocene as a past warm climate analogue.

The Bolin Centre Database experts Rezwan Mohammad and Anders Moberg built the portal, which is now ['live' >](#)

## New datasets in the Bolin Centre Database

PhD-day on 4 November - last day to register is today!

Dear PhD students and Postdocs,  
The Bolin Centre Climate Research School is organizing a PhD-day on November 4th

exclusively for PhD-students and postdoctoral researchers. **Last day to register is 15 October.**

This is an opportunity to meet your colleagues and to practice communicating your work with a presentation or poster – or both. There will be a Presentation Competition for regular presentations and the best presentations will be awarded the following amount of money for research:

- 1st price: 20 000 SEK
- 2nd price: 10 000 SEK
- 3rd price: 5 000 SEK

Since we don't know how the situation will be during the fall we are planning to have it as an onsite-venue as well as on Zoom for those who cannot attend in person. Apart from the PhD presentations during the day, there will be a healthy, climate smart lunch as well as a dinner to conclude the event.

Very welcome!

Carmen and Otto

### World Climate Research Programme calls

The World Climate Research Programme (WCRP) is launching several calls:

[The WCRP Academy Lighthouse Activity is seeking an individual or research group to conduct approximately six months of research and analysis into climate science training opportunities across the globe. Deadline: 1 November »](#)

[WCRP Academy Climate Training Stocktake Survey 2021. Deadline: 26 November »](#)

[Open call for nominations to the Stratosphere-troposphere Processes And their Role in Climate \(SPARC\) Scientific Steering Group. Deadline 21 November »](#)

---

### Open call: Demonstrator projects

This is a call for Demonstrator projects – projects that can demonstrate and disseminate technologies for digital transformation and its impact on society. Projects are expected to show novelty, high impact, and wide outreach. Eligible researchers at KTH schools, Stockholm University (SU), and RISE Digital Systems are encouraged to apply. The call opens 1 November.

## Bolin Centre Seminar Series RA8

**Title:** Variation in the thermal tolerance of plants at global and local scales

**Speaker:** Aelys M. Humphreys, Department of Ecology, Environment and Plant Science

**Time:** 20 October, 14h00-15h00

**Location:** William Olsson and Zoom

Temperature has long been considered one of the strongest determinants of plant distribution patterns globally. This is particularly true for cold temperatures because the physiology required to tolerate cold and freezing conditions is complex and assumed to be difficult to evolve. Yet, since their origins in the warm, wet tropics, flowering plants have clearly transitioned to temperate climates multiple times independently. Furthermore, evidence to suggest that cold tolerance can evolve relatively quickly is accumulating. Aelys M. Humphreys will present her ongoing research that addresses this contradiction.

## Klimatmodellering uppmärksammades genom årets Nobelpris i fysik

"Det här är ett Nobelpris som är jätteviktigt för den klimatmodellering som vi på SMHI arbetar med och som ligger till grund för samhällets hantering av klimatfrågan". Så kommenterar Erik Kjellström, SMHIs professor i klimatologi, nyheten om att 2021 års Nobelpris i fysik tilldelats forskning som bidragit till att lägga grunden för kunskapen om jordens klimat och hur det förändras på grund av de mänskliga utsläppen av koldioxid.
