Bolin Centre for Climate Research

A collaboration between Stockholm University, KTH and SMHI

Week 22, 2018

[Klicka här för att läsa brevet i din webbläsare](#)

The Bolin Centre is a multi-disciplinary consortium of over 350 scientists in Sweden that conducts research and graduate education related to the Earth's climate.

Report from the Bolin Centre Climate Festival

The Climate Festival is our biggest outreach event and is arranged yearly. This year we had over 1200 participants and the overall response from them has been very positive! A TV-team from UR Samtiden filmed all the popular science talks, this will be made into a TV-program which will probably be aired in the fall. The president of Stockholm University, Astrid Söderbergh Widding, visited the festival. You can read her thoughts about the festival [HERE»](#)

The Bert Bolin lecture with Veerabhadran Ramanathan was also given during the festival. The well visited lecture was engaging and focused on the possibilities of solving climate problems. You can watch is [HERE»](#)

Course on e-Science tools for climate research

The course announcement for this year's NeGI course "Climate science at high latitudes: Modeling and model evaluation", co-sponsored by the Bolin Centre, is out. This course aims to teach in a Nordic framework the next generation of scientists to integrate different e-Science tools and infrastructures to achieve a more holistic interpretation of the climate system and its components through model and data analysis. Summer School on Arctic Climate - deadline for registration today May 31

Do not forget to sign up for this year's summer school which will be held at the Abisko Scientific Research Station, August 27th-31st.

Information and registration: [HERE»](#)

Call for research proposals in RA4 | Deadline today May 31 2018

The Bolin Centre Research Area 4 "Biogeochemical Cycles and Climate" invites new research proposals. We seek to fund two different types of projects during 2018-2019. One category is Innovation Projects of clear demonstrated novelty, with a potential risk, but high gain. The second category is Consolidation Projects, which

build on already existing projects in an advanced stage with the purpose to support interesting complementary analyses. Volume for both types of projects is 100 kSEK, but depends on a clearly written work plan and budget justification. More info: [HERE»](#)

BOLIN CENTRE SEMINARS AND EVENTS

7-8

June

RA6 & RA1 Joint workshop

We are excited to announce an RA6-RA1 workshop focusing on the middle Miocene warm climate and its tantalizing research questions. This will be a full two day workshop on 7-8 June 2018.

More info: [HERE»](#)

OTHER SEMINARS AND EVENTS

10-12

Oct

The Nordic PhD conference

This conference is for all PhD students working on climate related subjects in Nordic countries. The conference is organized for and by PhD students, aiming to gather PhD students from different Nordic countries working in climate sciences. Registration deadline: July 20. No registration fee but please note that registration will become binding after 20 July.

Time & place: 10-12 Oct, Svarstadhytta, Svarstad, Norway
