The Bolin Centre is a multi-disciplinary consortium of over 350 scientists in Sweden that conducts research and graduate education related to the Earth's climate.

### Bolin Centre Summer School in Abisko

The Bolin Centre Summer School on Arctic Climate is held right now (August 27-31) at the Abisko Scientific Research Station. The course gives an introduction to the Arctic environment and climate change in this vulnerable region. The course is a mix of lectures, field trips and hands on group work with existing datasets to see how different research communities assess climate change in the Arctic region.

### "Don't walk on the grass - do some science on it!"

Research in Iceland explores whether the grass on heated soils still has the capability to survive a harsh winter, read more [HERE»](#)
