

Requirements of technical support at dissertation

Student:

Date and location:

If the dissertation is to be made available on-line the technical division will provide support during the dissertation. The link to the stream will be included in the public announcement of the defense. Not all rooms support on-line streaming of defenses.

Note that by decision by the faculty the respondent and the chair of the dissertation are required to be present physically!

Furthermore, if either opponent or a member of the grading committee participates via video-link one also has to arrange for these services in the room where the committee will deliberate.

Therefore the supervisor should complete this form and attach it to the form requesting the defense.

It is imperative that if there are changes to the arrangements these are communicated to the subject responsible, and the technical division (dsa@fysik.su.se) as soon as they are known. This service puts constraints on which rooms can be used, and requires scheduling of personel, therefore **late modifications might be very difficult to accomodate!**

<input type="checkbox"/>	The dissertation will not be made available on-line
<input type="checkbox"/>	The defense will be transmitted on-line, but the meeting of the committee is local.
<input type="checkbox"/>	The defense will be transmitted on-line and the members of the grading committee and/or the opponent will participate via video-link.
	In this case you need to fill in the detailed information below!

		Present	On videolink
Opponent	name: _____	<input type="checkbox"/>	<input type="checkbox"/>
	e-mail: _____		
Committee member 1	name: _____	<input type="checkbox"/>	<input type="checkbox"/>
	e-mail: _____		
Committee member 2	name: _____	<input type="checkbox"/>	<input type="checkbox"/>
	e-mail: _____		
Committee member 3	name: _____	<input type="checkbox"/>	<input type="checkbox"/>
	e-mail: _____		
Reserve member	name: _____	<input type="checkbox"/>	<input type="checkbox"/>
	e-mail: _____
