ETELHEM

37S. Tänglings

GF C 9243, SHM–KMK 22865 (no 24 and 207)

Year: 1941

Category of find: hoard

Container: wooden box

Number of coins: 318

Other objects: 1 ring brooch, cut up in 4 pieces, 1 brooch pin, cut and bent, 2 armlets, 1 finger ring, 4 spiral rods (1 complete, 3 cut.) Cf. Sbr 147, Abb. 39

Weight: coins 828.73 g, other objects 551.55 g, total 1380.28 g

Table of Coins

	complete	cut or fragm.	total	earliest	latest
Islamic	220	79	299	743/4	945/6
Eastern Europe	7	7	14		
Blank flans	4	1	5		
Whole find	231	87	318		

Date of deposit: after 945/6 (no 288)

COMMENTS

The main part of the find was discovered on September 19th, 1941 by Miss Rosa Borg, Tänglings, Etelhem, in a little by-lane c. 275 m south of the cross-roads Etelhem-Lye, Etelhem-Garde. The find locality is situated c. 1 km NNE of the unit Tänglings. The objects lay at a depth of c. 4–5 cm under the road surface, within a rectangular area measuring only c. 20 x 15 cm. The coins lay separately in two parallel piles in the longitudinal direction of the lane (NE/SW). Alongside lay the other objects partly fitted into one another. Remains of wood were found along the sides. It seems likely that the objects lay in a small wooden box. Earlier during the summer two coins had been found on the same spot and further investigation has brought to light another two.

This hoard was originally published in 1982 in CNS volume 1.3. Since then, major progress has been made concerning the identification of imitations, and several coins published in 1982 as official issues are today recognised as imitations. This is why the hoard is now republished. When possible, the identification of the Samanid coins and the imitations has been added, and all coins are illustrated. The coins have been renumbered, and the 1982-numbers are given in brackets.
